DETAILED ACTION

Election Acknowledgment

1. Applicant argument regarding the election of species is persuasive, and the election requirement is withdrawn. All claims, i.e., claims 1-22 will be examined.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1, 3-4, 10-11, 13-15, 17 are rejected under 35 U.S.C. 102(b) as being anticipated by Aoki et al.

Regarding claim 1, Aoki et al., discloses a seat weight measuring apparatus with features of the claimed invention including a strain gauge retaining assembly comprising a bracket having apertures (bracket 21 with holes 21g and 21e), a strain gauge having a body (portion shown by numeral 50 in figure 1A) and a mounting portion extending from the body (element 23 which is separated from element 50), the mounting portion extending through the aperture; and a spring clip (element 29) resiliently biasing the body into engagement with the bracket.

Regarding claims 3-4, the spring clip has two surfaces with a U-shaped recess defining a pair of leg and had a projection extending outward (from the top edges, see figure 1(a)).

Regarding claim 6, apparently any u-shape has necked region (at the bottom of letter u).

Regarding claim 10, the mounting portion includes shoulder and bolt.

Regarding claim 11, 13, 15, 17, the spring clip is curved inwardly.

4. Claims 2, 5, 7-9, 12, 14, 16, 18, are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

5. Claims 19-22 are allowed for the inclusion of a groove and specific configuration of the spring clip with respect to ridges.

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
